

# Oyster River Environs Archaeology Project

## 2010 SCRAP Field School

A four week archaeological field school will be conducted at the site of the Field-Bickford Garrison, located on Durham Point at the mouth of the Oyster River on Little Bay in Durham, NH. The field school will be conducted under the auspices of the NH State Conservation and Rescue Archaeology Program (SCRAP) in cooperation with the firm of Crane and Morrison, a Cultural Resources Management firm based in Freeport, Maine. Craig J. Brown will supervise the investigations in coordination with Dr. Richard Boisvert, NH State Archaeologist. The field school is open to the public and has the dual goals of investigating a highly significant early historic site while engaging members of the public in professional quality archaeology.

The Field-Bickford Garrison was initially built prior to 1638 as a pioneer homestead, ordinary (tavern) and ferry landing. It served as a key point of entry to the Oyster River Plantation, one of the first English settlements in New Hampshire. The site was one of the fortified structures attacked in the famous Oyster River Plantation Massacre of 1694 and survived a determined assault by an Abenaki force through the brave and clever actions of Thomas Bickford. The structure however has a far wider history, having been the property of Darby Field, famous as the first European to have summited Mt. Washington, and as a major economic nexus for the emerging colony. A preliminary inspection of the site has identified the probable house cellar and artifacts on the adjacent shore that date to the period in question.

The specific research objective for the 2010 field school is to continue work on the Bickford Garrison, define the limits of the structure, locate the well, identify associated outbuildings and related ferry facilities, and establish a baseline of information for a broader investigation of this and related Oyster River Plantation sites. The field investigations will incorporate standard archaeological field excavation techniques, working with a rigorously defined grid system and employing ground penetrating radar and other remote sensing equipment. This investigation will specifically lay the groundwork for longer range research over the coming years.

The full cooperation of the property owners, Barbara and Helen Langley has been secured. The property also has a conservation easement held by The Nature Conservancy, whose cooperation and support has also been assured.

The ultimate goal is to bring to light an immensely important and complex, though poorly understood, era of New Hampshire's early colonial history. Previous research and publication by Craig J. Brown has gone far to clarify the circumstances of this site and its associated history, however only a small portion of the historic potential has been revealed. The archaeological investigations will add considerable empirical data to the historic record.

**STATE CONSERVATION AND RESCUE ARCHAEOLOGY PROGRAM  
Oyster River Environs Archaeology Project  
2010 Field School Registration Form**

NAME \_\_\_\_\_ E-MAIL \_\_\_\_\_

ADDRESS \_\_\_\_\_ PHONE \_\_\_\_\_

\_\_\_\_\_

Date of Birth \_\_\_\_\_ (*Participants must be at least 16 years of age*)

*Please check below the session(s) you plan to attend.*

\_\_\_ Session 1 June 14 – June 25    \_\_\_ Session 2 June 28 – July 9

**VOLUNTEER PARTICIPATION** Individuals may participate as **SCRAP** Volunteers. There is no fee for participation as a volunteer; however we request a \$35 donation to defray costs of supplies and instructional materials. Because the field school is offered at no charge, we cannot offer college credit or accommodations. However, we will work with advisors to set up an independent study for those students who are interested. Successful completion of the fieldwork will earn SCRAP certification for Excavation or Survey Technician. Minimum age is 16. The Field-Bickford site is located in the heart of the New Hampshire seacoast. Information on area attractions and accommodations available upon request or at the Project website: [www.oreap.org](http://www.oreap.org).

**For additional information, please call 207-337-8144.**

**REGISTRATION** Volunteers must complete the attached registration form above and send it with a brief statement indicating why they wish to join the field school to:
